PRODUCTS / PEOPLE / PROCESS

THE COMPANY

ONE TEAM. FROM FIRST MEASURE TO FINAL FIT.

Standard Fabtech designs, fabricates and installs uPVC windows and doors for homes, renovations and project work across Kashmir.

Kashmir building concept image.

Illustrative uPVC fabrication scene.

MADE IN BARAMULLA

Direct factory coordination. Kashmir-wide installation.

Your project stays connected from the opening survey through fabrication, delivery, fitting and handover.

01

MEASURE

Review the opening, exposure, use and site conditions.

02

SPECIFY

Match profile, glass, hardware, finish and operation.

03

MAKE + INSTALL

Fabricate in Baramulla and fit the agreed units on site.

DESIGNED AROUND THE SITE

THE OPENING IS THE STARTING POINT.

Kashmir winters, mountain views, ventilation and privacy all shape the right opening. We help turn those decisions into a buildable window or door package.

01

LOCAL RESPONSE

A Baramulla team for projects throughout Kashmir.

02

COMPLETE ASSEMBLY

Frame, reinforcement, glass, seals, hardware and installation considered together.

03

CLEAR HANDOVER

The agreed operation, care and finish are checked at handover.

DIRECT FACTORY / BARAMULLA

VEKA profile systems · installation across Kashmir

WINDOWS

OPENINGS THAT WORK WITH THE ROOM.

Use the product family to set the direction, then resolve the panels, glass, mesh, grille and hardware around the actual opening.

CASEMENT

Side-hinged ventilation with a close-fitting seal.

SLIDING

Horizontal movement where swing space is limited.

TILT & TURN

Controlled tilt ventilation plus a wider inward turn.

TOP-HUNG

Practical high-level ventilation for service spaces.

FIXED + OPENING

Compose daylight, view and ventilation in one elevation.

BAY / SPECIALTY

Shape the view with a considered multi-panel composition.

SELECT FOR

Ventilation · view · privacy · cleaning access · furniture clearance · room use

DOORS

OPEN THE ROOM TO MORE.

From a balcony connection to a wide veranda opening, the door is designed around the span, the traffic flow and the daily use of the room.

FRENCH / CASEMENT

Hinged leaves for a full, welcoming opening.

SLIDING

Smooth horizontal movement for larger glazed openings.

SLIDE & FOLD

Multiple leaves fold away for a broad connection.

COMBINATIONS

Fixed and opening panels composed to suit the elevation.

SPECIALTY FORMS

Arched and feature openings for distinctive façades.

WIDE CONNECTIONS

Project the view with a planned multi-panel arrangement.

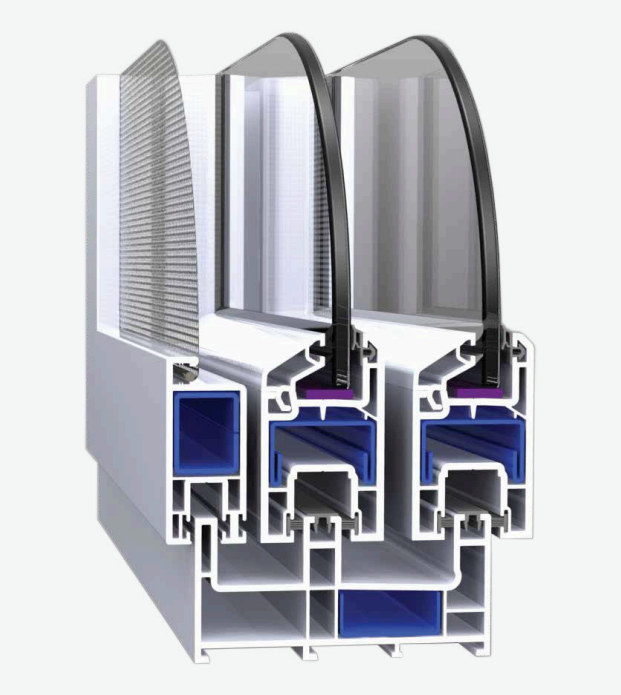
Handle, threshold, glazing, screens and clear passage are agreed before fabrication.

ENGINEERING THE ASSEMBLY

MORE THAN A PROFILE.

A reliable opening is a complete assembly: profile, reinforcement, glass, seals, hardware and the way the frame meets the building.

I-60 casement reference cutaway.



I-60 sliding reference cutaway.

Sliding: I-44 · I-50 · I-60 · I-64 · I-75

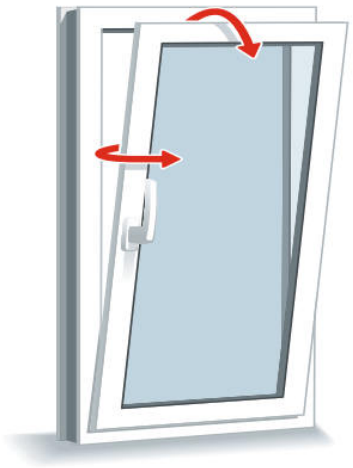
VEKA SYSTEMS

The suitable profile family, reinforcement, glazing bead, hardware and permissible size are confirmed in the project specification.

DETAILS

SPECIFY THE WAY THE ROOM FEELS.

The frame is only one part of the decision. We coordinate the visible finish and the working components around the room and the project brief.



HARDWARE

Handles, hinges, rollers and multipoint locking are selected for the opening type, sash size and daily use.

OPERATION

Tilt-turn, sliding and hinged systems use different movement sequences. The team demonstrates operation at handover.

THE SPECIFICATION STACK

GLASS

Single, double-glazed, laminated or privacy options as suitable.

MESH + GRILLE

Insect screening and Georgian details where compatible.

FINISH

White, woodgrain and other selected options; confirm samples before ordering.

Indicative options. The approved quotation confirms the current system and finish range.

DESIGN LANGUAGE

A FINISH THAT BELONGS TO THE ELEVATION.

Clean contemporary lines, timber warmth or a heritage influenced façade: the frame colour should support the architecture and interior together.

Illustrative Kashmiri residential elevation.

FINISH DIRECTIONS

WHITE

Clean and architectural.

GOLDEN OAK

Warm timber character.

RUSTIC OAK

Natural depth and grain.

MAHOGANY

Rich and distinctive.

Illustrative finish samples. Confirm physical colours and current availability before ordering.

THE STANDARD FABTECH WAY

A CLEAR PROCESS FROM SITE TO HANDOVER.

The details are resolved in the order they affect the build, so the final opening is easier to review, fabricate and install.

Illustrative Kashmir installation scene. Standard Fabtech coordinates site fitting and handover.

01

SITE REVIEW

Opening dimensions, reveals, levels, access and use.

02

DESIGN + SPECIFY

Product family, panels, glass, mesh, grille, hardware and finish.

03

FABRICATE

Cut, reinforce, weld / assemble and prepare the agreed units in Baramulla.

04

INSTALL + HANDOVER

Set, align, secure, seal, test movement and explain operation.

One coordinated conversation — from first measure to final fit.

APPLICATIONS

BUILT FOR THE SPACES PEOPLE USE.

The same careful approach scales from one replacement window to a coordinated opening package for a new building.

Illustrative Kashmir home and hospitality concepts.

HOMES + VILLAS

View-focused façades, warm living rooms, bedrooms and renovations.

APARTMENTS

Repeatable specifications, practical operation and consistent details.

HOSPITALITY + OFFICES

Guest rooms, workspaces, verandas and larger glazed areas.

INSTITUTIONS

Schools, libraries, mosques and community spaces with varied needs.

Concept imagery illustrates possible applications; it does not represent completed Standard Fabtech projects.

FOR HOMEOWNERS, ARCHITECTS & BUILDERS

BRING THE OPENING. WE WILL HELP RESOLVE THE REST.

A useful quotation starts with a clear picture of the project. Send what you know; the remaining details can be confirmed during the site review.

WHAT TO SHARE

- Project location in Kashmir
- Drawings, photos or opening list
- Approximate dimensions and quantities
- Preferred window / door styles
- Glass, privacy, mesh or grille needs
- Colour and finish direction

WHAT WE CONFIRM

01 Site dimensions and opening condition

02 Panel layout and handing

03 Profile family and reinforcement

04 Glazing and hardware combination

05 Installation sequence and access
